AND ON THE TRADE OF CHITTAGONG PORT,

FOR THE YEAR 1892-93.

CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS report, the seventeenth of its kind published by the Government of Bengal since the year 1876-77, deals with the trade registered during the official year 1892-93 on the rivers and canals of the Lower Provinces of Bengal, with the inland trade of Calcutta, and with the trade, inland and sea-borne, of the Chittagong ports. It is based on the returns and reports noted on the margin. Statistics relative to the rail-borne traffic of these Provinces since 1884-85 are reviewed in a separate report, entitled the "Report on the Rail-borne Traffic of Bengal."

1. Fortnightly returns of traffic carried by country boats along the Bhagirathi, the Jalangi and the Mathabhanga, commonly called the Nadia rivers.
2. Fortnightly returns of traffic carried by country boats on the Midnapore, Hijili and Orissa canals, and the Orissa Coast Canal.
3. Fortnightly returns of traffic carried to, and from, Calcutta by country boats and carts registered at a cordon of 24 stations around Calcutta and Howrah.
4. Monthly statements of traffic carried along the Brahmaputra and Meghna rivers by the steamers of the India General Steam Navigation Company and the Rivers Steam Navigation Company.
5. Monthly statements of traffic carried along the Ganges, the Bhagirathi, the Jalanghi and the Hooghly rivers to, and from, Calcutta by the steamers of the India General Steam Navigation Company and the Calcutta Steam Navigation Company.
6. Quarterly statements of traffic carried by country boats between Bengal and Assam registered at Bhairab Bazar on the Meghna river and at Dhubri on the Brahmaputra.
7. Monthly and quarterly returns of traffic carried to, and from, Calcutta by the East Indian Railway, the Eastern Bengal State Railway and connected lines.
8. Annual statements of the sea-borne trade of Calcutta.
9. Annual statements of the inland and sea-borne trade of Chittagong.
10. Quarterly, half-yearly, and annual statements showing the wholesale prices per maund of all articles of trade received from 12 selected district officers, and also from the Collector of Customs, Calcutta, the Board of Revenue, Lower Provinces, and from the principal Indigo and Tea Brokers in Calcutta.
11. General Administration Reports submitted to Government by Commissioners of Divisions.
12. Special reports on trade submitted to Government by district officers.
13. Annual statement of the Sea-borne Trade and Navigation of the Bengal Presidency published by the Collector of Customs, Calcutta.
14. Annual Report by the Board of Revenue, Lower Provinces, on the administration of the Salt Department.
15. Special reports submitted to Government by the local officers on the condition of the trade on the Nadia rivers, the Calcutta, Midnapore, Hijili, and Orissa canals, and the Orissa Coast Canal.

During the year under report no change was made in the system under which the internal trade of the Province is registered, nor in the mode of registration of the trade of Calcutta and Chittagong.

Trade along the chief routes.

2. The statistics which are furnished in Chapters II to IX of this report include—

The boat traffic registered on the Nadia rivers.

The boat and steamer traffic registered on the Brahmaputra and Meghna rivers.

The steamer traffic on the Ganges, the Bhagirathi, the Jalangi, and the Hooghly rivers.

The boat traffic registered on the Midnapore and Hijili canals.
The boat traffic registered on the Orissa canals and the Orissa Coast Canal.
The boat traffic registered on the Calcutta canals.

3. The boat traffic on the Brahmaputra and Meghna rivers which crosses from Bengal into Assam and *vice versâ* is registered at Bhairab Bazar and Dhubri under arrangements made by the Assam Administration. The steamers plying on the Brahmaputra and Meghna rivers between Bengal and Assam belong to the India General Steam Navigation Company and the Rivers Steam Navigation Company. Those on the Ganges belong to the India General Steam Navigation Company, and the steamers of the Calcutta Steam Navigation Company run between Calcutta and marts in the Burdwan, Midnapore, Hooghly, Nadia, Murshidabad, and Balasore districts. Statistics of the traffic carried by all these companies have been obtained by Government from their records.

The acknowledgments of the Lieutenant-Governor are again due to the Agents of these Companies for the courtesy with which they have invariably permitted their trade statistics to be used by Government.

Trade in large towns and commercial centres.

4. The inland trade of Calcutta and the inland and sea-borne trade of the Chittagong port are described separately in Chapters VIII and IX. The boat and road traffic of Calcutta is registered by means of a cordon of registering stations, 24 in number, placed on the Hooghly and on the canals and roads around Calcutta and the Suburbs and Howrah. For Chittagong, the returns exhibit the sea-borne trade, foreign and coasting, as well as that carried by country boats.

Classification of commodities.

5. The classification of articles followed in this report is unchanged, and is in accord with the classification list which is adopted for the registration of the rail-borne trade of India.

Value of commodities.

6. The values of all the articles of trade specified in the valuation statement appended have been assigned according to the system adopted since 1887-88, *i.e.*—

(1) For the following articles of European merchandise exported inland the value rates have been obtained from the Calcutta Custom House invoices:—

Cotton twist and yarn, European.		Oil ...	Kerosine.
Dyes ...	Aniline.	Paper and pasteboard.	
Leather ...	Manufactured.	Salt.	
Liquors	Beer.	Silk, raw ...	Foreign.
	Wines.	Do. piece-goods ...	Do.
	Spirits.	Spices ...	Betelnuts.
Metals	Copper, unwrought.		Pepper.
	Brass, ditto.		Cardamoms
	Copper, wrought.	Sugar ...	Refined.
	Brass, ditto.	Tea ...	Foreign.
	Iron.	Wool, manufactured, European.	

(2) In the case of opium and other intoxicating drugs and chemicals the actual cost of the articles as manufactured for Government or the trade, as the case may be, has been obtained from the Board of Revenue, Lower Provinces, and adopted.

(3) For articles included under the sub-head "Others," value rates have been ascertained once for all and standard rates adopted.

(4) For the other articles enumerated in the classification list, the value rates have been fixed on the basis of local prices from selected districts, and of prices prevailing in the chief markets.

7. In the trade returns for all articles of import into Calcutta from British provinces, the value rates of the exporting provinces have been taken, while in the case of exports from Calcutta the value rates have been assigned according to the valuation statement mentioned above, which has also been adopted in the valuation of the internal trade, import and export, of the Lower Provinces of Bengal.

General summary of the seasons and results of the harvests and notice of prices.

8. This summary has been published in the report on the rail-borne trade of Bengal.

CHAPTER II.

2. The falling off in the traffic was due to the Jalangi alone being open throughout the year; the entrance of the Mathabhanga from the Ganges was in a bad state, as in the previous year, and the Bhagirathi became silted up after the close of the rains: further, the railway, by affording greater facilities for trade, drew away a portion of the traffic which would otherwise have been carried by the Bhagirathi.

3. *Downstream traffic.*—According to weight, the past year's traffic showed a falling off of 14·95 per cent. as compared with the traffic of 1891-92, and of 21·92 per cent. as compared with that of 1890-91. The fluctuations in the principal articles carried downstream during the past two years are shown below:—

	Total traffic registered in 1892-93.	Variations as compared with 1891-92.

4. *Jute, raw.*—The great bulk of this traffic comes from Northern Bengal. Last year the largest decrease compared with 1891-92 occurred in the consignments from Pabna (49,444 maunds), Malda (42,397 maunds), Purnea (41,496 maunds) and Rajshahi (32,530 maunds), and the only districts which showed an increase are Dinajpur (39,272 maunds) and Nadia (31,670 maunds).

5. *Food-grains.*—The total traffic in food-grains fell from 26,24,669 maunds in 1891-92 to 19,95,989 maunds in 1892-93. The decrease is observable

in respect of all grains, except "other food-grains," which showed an advance of 36·10 per cent. in comparison with the previous year's figures.

In the case of wheat, the largest decrease is shown against Nadia, which supplied 1,18,630 maunds against 2,26,188 maunds in the previous year. Among other supplying districts, Bhagalpur showed a falling off of 66,036 maunds, Patna of 62,102 maunds, Murshidabad of 56,484 maunds and Malda of 29,274 maunds. As regards rice, the shipments from Dinajpur fell from 2,67,854 maunds in 1891-92 to only 9,203 maunds in the past year, and the only district which showed an appreciable increase was Burdwan, which contributed 1,89,302 maunds against 1,26,985 maunds in 1891-92. The fluctuations in the trade in gram and pulses were mainly due to shorter despatches from Nadia (1,18,874 maunds), Bhagalpur (27,060 maunds) and the Sonthal Parganas (21,650 maunds). As to miscellaneous food-grains, there was a decrease of 75,532 maunds in the shipments from Bihar, the deficiency being most noticeable in the case of Bhagalpur, but this decrease was more than made up by increased supplies drawn from Nadia (3,06,911 maunds against 1,41,848 maunds) and Murshidabad (1,55,149 maunds against 82,006 maunds).

The different trade blocks from which the food-grain supply during the past two years was received, are shown in the subjoined tables:—

6. *Oilseeds.*—Under linseed, there has been a considerable decrease in the total quantity registered during the past year. Compared with 1891-92, the exports from Patna fell off by 1,76,114 maunds, those from Bhagalpur by 35,478 maunds, those from Darbhanga by 30,817 maunds, those from Monghyr by 25,704 maunds, and those from Murshidabad by 36,156 maunds, the only district showing an increase being Saran (98,053 maunds against 55,911 maunds).

Under mustard-seed, however, there was some recovery in the past year's trade as compared with 1891-92, but the figures are still below those of 1890-91 by 27,564 maunds. The increase is general, and every supplying district contributes a share except Bhagalpur, which shows a falling off of from 1,13,874 maunds in 1891-92 to 97,780 maunds in 1892-93.

In the following statements the total quantities of linseed and mustard seed carried downstream during the past two years are distributed according to the different trade blocks from which the supplies were exported:—

7. *Upstream traffic.*—The figures for the past year are 12·98 per cent. below the trade of 1891-92, but they are in excess of that of 1890-91 by 3·25 per cent. The chief articles, with their fluctuations, carried upstream during the year 1892-93 were as follows:—

9. *Rice and paddy.*—The exports of rice were slightly below the figures for 1891-92. Last year the demand from the Nadia district continued large, but that from Saran and Purnea fell off considerably, as will be seen from the details given below:—

	1891-92. Maunds.	1892-93. Maunds.
Nadia	91,622	1,06,393
Saran	41,992	12,383
Purnea	17,814	9,275
Ghazipur	12,330	7,594
Darbhanga	3,048	90
Bhagalpur	1,755	3,380
Patna	1,168	1,339
Other districts	3,858	4,801
Total ...	1,73,487	1,45,255

As usual, paddy was chiefly exported to Nadia, which, however, received only 85,490 maunds against 2,57,284 maunds in the preceding year.

10. *Salt.*—The large increase of 151,295 maunds in the exports of salt by this route is worthy of notice. Further particulars of this trade are given in the Calcutta section of this report.

Exports.

figures were 17·37 per cent. above those of 1890-91. The fluctuations in the principal articles of traffic are given in the table below :—

CHAPTER VII.

TRAFFIC OF THE BRAHMAPUTRA AND MEGHNA RIVERS, INTERNAL AND EXTERNAL (WITH ASSAM).

THE traffic hitherto carried by the steamers of the Eastern Bengal State Railway is now conveyed by the India General and Rivers Steam Navigation Companies, who ply their steamers on the Brahmaputra and Meghna rivers in connection with the Eastern Bengal State Railway, *vid* Goalundo, and the entire traffic carried by them, both on their own account and on account of the Eastern Bengal State Railway, is now returned in one statement and has been so returned from the 1st April 1892. The statistics of trade for the past year, therefore, are shown under the following two heads:—

(1) Traffic carried by the River Steamer Companies;
(2) Trade of Bengal with Assam carried by country boats.

2. The following statements show the total quantity and value of the traffic, internal and external (with Assam), registered during the past three years:—

3. A consolidated statement showing the details of the river-borne trade between Bengal and Assam carried by steamer as well as by country boat during the past year will be found in the appendix to this report. Statistics of the trade carried by inland steamers and country boats are reviewed separately in the following pages.

RIVER-BORNE TRAFFIC CARRIED BY INLAND STEAMERS.

Of the other principal staples, there were increases under raw cotton, rice, and hides, against decreases under mustard-seed, gunnies, and gram and pulse. As regards exports, the value of the traffic in European piece-goods showed a considerable advance, namely, Rs. 1,65,90,774, against Rs. 1,53,04,420 in the previous year; the other articles showing an increase being rice and salt.

8. In the import trade, the largest falling off is observable under tea (1,05,082 maunds) and mustard-seed (50,607 maunds). As regards exports, the large increase shown is for the most part accounted for by a considerable increase under iron (2,02,690 maunds against 1,69,173 maunds) and railway plant and rolling-stock (1,73,584 maunds against 7,049 maunds). The principal staples registered during the past two years, are specified in the abstract below:—

The largest decrease occurred in the quantities exported by rail. The road traffic also was slack during the year. The following statement shows in detail the different provinces to which piece-goods were exported from Calcutta during the past three years:—

Comparison of imports with exports.

17. With an addition of 25 per cent. to the total clearances from shipboard and from bond on account of under-statement of values, insurance, landing charges, &c., &c., the total value of the past year's import traffic would amount to Rs. 14,79,38,380. Of this amount, the value of piece-goods exported during the year was Rs. 12,58,02,578 as shown above. The value of the excess of imports over exports, therefore, amounted to Rs. 2,21,35,802, against Rs. 2,41,70,741 in 1891-92 and Rs. 96,58,765 in 1890-91.

20. If exports are deducted from imports, the value of piece-goods left for consumption is Rs. 4,59,07,795 during the past year, which, among a population of 44,510,713 souls (excluding Bihar and Orissa), would give an average consumption of Re. 1-0-6 worth of goods per head, against Re. 1-0-11 in 1891-92 and Re. 1-4-10 in 1890-91.

Comparison of imports with exports.

Comparison of imports with exports.

23. After deducting exports from imports, the value of piece-goods left for consumption in Bihar was Rs. 2,36,98,248, which gives an average yearly consumption of annas 15-5 per head of a population of 24,393,504 souls, against Re. 1-2-6 in 1891-92 and Re. 1-10-9 in 1890-91.

35. The following statement shows in detail the different provinces from which indigo was consigned to Calcutta during the past three years :—

The falling off in the despatches from Bihar were due to a decline in the imports, chiefly from Champaran (13,129 maunds), Muzaffarpur (12,165 maunds), Saran (9,044 maunds), and Darbhanga (8,827 maunds). In Bengal, Nadia sent 3,851 maunds against 14,561 maunds in 1891-92.

36. The bulk of the export trade was sea-borne, and its destination during the past three years was as follows :—

41. The great divergence in the figures between imports and exports represents part of the outturn of the mills in Calcutta and the suburbs, which does not fall within the scope of registration. The subjoined table shows the principal districts which contributed to the import trade during the past year, and the quantities imported, as compared with the totals of the two previous years:—

It has been explained in previous reports that gunny-bags and gunny-cloth are shown together in the railway returns. Moreover, in the case of the trade by road and river, this article is registered in pieces, while in the sea-borne trade returns it is shown in yards. For the purpose of converting pieces into yards, a machine-made piece is taken as equal to 80 yards, and a hand-made piece as equal to 22 yards. The foregoing figures, therefore, do not represent the actual extent of the transactions in Calcutta under this head, part of the trade in gunny-cloth having been included under the head "Gunny-bags."

44. The total quantity of the sea-borne trade of Calcutta in this article during the past three years was as follows :—

45. The following statement shows the principal localities which supplied power-loom and hand-made gunny-cloth to Calcutta during the past three years :—

48. The number of jute mills worked by steam in the vicinity of Calcutta during each of the past two years was 24 against 23 in 1890-91. The quantity of jute worked up in 1892-93 was 56,94,057 maunds, against 62,65,093 maunds in 1891-92, and 47,15,495 maunds in 1890-91. Figures, however, are not available to show separately how much of the raw material was used in making gunny-cloth and gunny-bags. The table below shows the number of looms and spindles at work, and the aggregate quantity of raw jute consumed in the mills in each district, during the past three years:—

The imports from the North-Western Provinces and Oudh were more than three times those of the preceding year, and were due to larger despatches from Agra (2,30,224 maunds), Cawnpur (1,45,148 maunds), Futtehpur (1,41,299 maunds), Aligarh (1,09,140 maunds), and Bara Banki (1,04,846 maunds). In Bengal the Nadia district showed the largest falling off, amounting to 3,43,131 maunds, and then comes Jessore, with a decrease of 87,778 maunds. The increase in the Panjab is almost entirely due to an advance of 2,40,217 maunds in the consignments from Delhi.

Though the oilseed crop in Bihar in 1891-92 was very poor, yet the imports into Calcutta in 1892-93 were practically the same as in the previous year. Of the Bengal districts, the largest decline occurred in the despatches from the districts of Faridpur (2,45,963 maunds), Jessore (44,593 maunds), and Dacca (43,959 maunds). Almost every district in the North-Western Provinces and Oudh sent larger supplies to Calcutta, the chief increases being 58,714 maunds from Bulandshahr, 58,292 maunds from Jaunpur, 40,733 maunds from Allahabad, 34,131 maunds from Fyzabad, and 27,061 maunds from Aligarh.

Owing to unfavourable weather the outturn of tea both in Assam and Bengal was smaller than in 1891-92, and consequently imports as well as exports showed a decline. For the first time since the trade in this article became of importance, there was a decrease in shipments in comparison with the previous year. The average price of tea sold in Calcutta during the past year was 8 annas 8 pie per lb, against 6 annas 8 pie in 1891-92 and 7 annas in 1890-91.

4. *Cotton, raw.*—The cotton crop of 1891-92 in the Chittagong Hill Tracts and in Hill Tippera was the finest ever known, and much of it was exported last year.

5. *Jute, raw.*—The increase in the quantity, and decrease in the value, of jute exported, is explained by large shipments of jute cuttings, which are of comparatively low value. The destination of the exports by sea during the past three years was as follows:—

Exports to foreign countries from Chittagong.

6. *Rice and paddy.*—The deltaic districts in the Bay of Bengal obtained good prices for rice in markets nearer than Chittagong, and their consignments to this port were less than in the two previous years.

The extent to which the different districts contributed to the past year's trade is shown below compared with the figures of the preceding two years :—

The falling off was owing chiefly to smaller shipments to Mauritius.

The quantities of rice and paddy sent to the different coast ports in India from Chittagong during the past three years, are detailed below :—

		1890-91.	1891-92.	1892-93.

Shipments were restricted owing to the price of rice ruling very high in the local market.

7. *Salt.*—The quantity of salt exported from Chittagong by country boats during the past three years was despatched to the following districts :—

Besides these supplies, the quantity of salt shipped for Narayanganj by sea-going vessels was 1,43,600 maunds, against 1,93,496 maunds in 1891-92 and 2,12,197 maunds in 1890-91.

REPORT

ON THE

RIVER-BORNE TRAFFIC OF THE LOWER PROVINCES OF BENGAL

AND ON THE INLAND TRADE OF CALCUTTA,

AND ON THE TRADE OF CHITTAGONG PORT,

FOR THE YEAR 1891-92.

CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS report, the sixteenth of its kind published by the Government of Bengal since the year 1876-77, deals with the trade registered during the official year 1891-92 on the rivers and canals of the Lower Provinces of Bengal, with the inland trade of Calcutta, and with the trade, inland and sea-borne, of Chittagong ports. It is based on the returns and reports noted on the margin. Statistics relative to the rail-borne traffic of these provinces since 1884-85 are reviewed in a separate report, entitled the "Report on the Rail-borne Traffic of Bengal."

1. Fortnightly returns of traffic carried by country boats along the Bhagirathi, the Jalangi and the Mathabhanga, commonly called the Nadia rivers.
2. Fortnightly returns of traffic carried by country boats on the Midnapore, Hijili and Orissa canals, and the Orissa Coast Canal.
3. Fortnightly returns of traffic carried to, and from, Calcutta by country boats and carts registered at a cordon of 24 stations around Calcutta and Howrah.
4. Monthly statements of traffic carried along the Brahmaputra and Meghna rivers by the steamers of the India General Steam Navigation Company and the Rivers Steam Navigation Company.
5. Quarterly statements of traffic carried on the Meghna river by the steamers of the Eastern Bengal State Railway.
6. Monthly statements of traffic carried along the Ganges, the Bhagirathi, the Jalangi and the Hooghly rivers to, and from, Calcutta by the steamers of the India General Steam Navigation Company and the Calcutta Steam Navigation Company.
7. Quarterly statements of traffic carried by country boats between Bengal and Assam registered at Bhairab Bazar on the Meghna river and at Dhubri on the Brahmaputra.
8. Monthly and quarterly returns of traffic carried to, and from, Calcutta by the East Indian Railway, the Eastern Bengal State Railway, and connected lines.
9. Annual statements of the sea-borne trade of Calcutta.
10. Annual statements of the inland and sea-borne trade of Chittagong.
11. Quarterly, half-yearly, and annual statements shewing the wholesale prices per maund of all articles of trade received from 12 selected district officers, and also from the Collector of Customs, Calcutta, the Board of Revenue, Lower Provinces, and from the principal Indigo and Tea Brokers in Calcutta.
12. General Administration Reports submitted to Government by Commissioners of Divisions.
13. Special reports on trade submitted to Government by district officers.
14. Annual statement of the Sea-borne trade and Navigation of the Bengal Presidency published by the Collector of Customs, Calcutta.
15. Annual Report by the Board of Revenue, Lower Provinces, on the administration of the Salt Department.
16. Special reports submitted to Government by the local officers on the condition of the trade on the Nadia rivers, the Calcutta, Midnapore, Hijili, and Orissa canals, and the Orissa Coast canal.

During the year under report no change was made in the system under which the internal trade of the province is registered, nor in the mode of registration of the trade of Calcutta and Chittagong.

Trade along the chief routes.

2. The statistics which are furnished in Chapters II to IX of this report include—

The boat traffic registered on the Nadia rivers.

The boat and steamer traffic registered on the Brahmaputra and Meghna rivers.

The steamer traffic on the Ganges, the Bhagirathi, the Jalangi, and the Hooghly rivers.

The boat traffic registered on the Midnapore and Hijili canals.

The boat traffic registered on the Orissa canals and the Orissa Coast Canal.

The boat traffic registered on the Calcutta canals.

3. The boat traffic on the Brahmaputra and Meghna rivers which crosses from Bengal into Assam and *vice versâ* is registered at Bhairab Bazar and Dhubri under arrangements made by the Assam Administration. The steamers plying on the Brahmaputra and Meghna rivers between Bengal and Assam belong to the India General Steam Navigation Company, the Rivers Steam Navigation Company, and the Eastern Bengal State Railway. Those on the Ganges belong to the India General Steam Navigation Company, and the steamers of the Calcutta Steam Navigation Company run between Calcutta and marts in the Burdwan, Midnapore, Hooghly, Nadia, Murshidabad and Balasore districts. Statistics of the traffic carried by all these companies have been obtained by Government from their records.

The acknowledgments of the Lieutenant-Governor are again due to the Agents of these Companies for the courtesy with which they have invariably permitted their trade statistics to be used by Government.

Trade of large towns and commercial centres.

4. The inland trade of Calcutta and the inland and sea-borne trade of the Chittagong port are described separately in Chapters VIII and IX. The boat and road traffic of Calcutta is registered by means of a cordon of registering stations, 24 in number, placed on the Hooghly and on the canals and roads around Calcutta and the Suburbs and Howrah. For Chittagong, the returns exhibit the sea-borne trade, foreign and coasting, as well as that carried by country boats.

Classification of commodities.

5. The classification of articles followed in this report is unchanged, and is in accord with the classsification list which is adopted for the registration of the rail-borne trade of India.

Valuation of commodities.

6. The values of all the articles of trade specified in the valuation statement appended have been assigned according to the system adopted since 1887-88, *i.e.*—

(1) For the following articles of European merchandise exported inland the value rates have been obtained from the Calcutta Custom House invoices:—

Cotton twist and yarn, European.		Oil ...	... Kerosine.
Dyes ...	Aniline.	Paper and pasteboard.	
Leather ...	Manufactured.	Salt.	
Liquors ...	Beer.	Silk, raw ...	... Foreign.
	Wines.	Do. piece-goods	... Do.
	Spirits.	Spices ...	... Betelnuts.
Metals ...	Copper, unwrought.		Pepper.
	Brass, ditto.		Cardamoms.
	Copper, wrought.	Sugar ...	... Refined.
	Brass, ditto.	Tea ...	... Foreign.
	Iron.	Wool, manufactured, European.	

(2) In the case of opium and other intoxicating drugs and chemicals the actual cost of the articles as manufactured for Government or the trade, as the case may be, has been obtained from the Board of Revenue, Lower Provinces, and adopted.

(3) For articles included under the sub-head "Others," value rates have been ascertained once for all and standard rates adopted.

(4) For the other articles enumerated in the classification list, the value rates have been fixed on the basis of local prices from selected districts, and of prices prevailing in the chief markets.

7. In the trade returns for all articles of import into Calcutta from British provinces, the value rates of the exporting provinces have been taken, while in the case of exports from Calcutta the value rates have been assigned according to the valuation statement mentioned above, which has also been adopted in the valuation of the internal trade, import and export, of the Lower Provinces of Bengal.

General summary of the seasons and results of the harvests and notice of prices.

8. This summary was in previous years published both in this report and in that on the rail-borne trade of Bengal. It has, however, now been decided to deal with the subjects in the latter report only.

CHAPTER II.

2. Owing to an obstruction at the entrance of the Matabhanga river as stated in last year's report, a portion of the traffic which would ordinarily have been carried by that route had to pass through the Jalangi river which remained open during the dry season, and hence the fluctuations noticed above in the traffic carried along those two rivers. The proportion of the Calcutta traffic to the total trade is 62·17 per cent. in the down traffic, and 24·64 per cent. in the up traffic.

3. *Downstream traffic.*—The following statement shows the fluctuations in the principal staples carried downstream during the past year:—

4. *Jute, raw.*—The largest falling off occurred in the consignments from the Pabna district, which amounted to 1,34,349 maunds, against 2,26,327 maunds in the preceding year. Decreases are also observable in the shipments from Malda, Rajshahi, and Dinajpur, the only districts showing an increase being Murshidabad, Nadia, and Purnea.

5. *Lime and limestone.*—The increase occurred in the despatches from the Assam Valley. From Burdwan also larger quantities of ghooting lime were consigned to Calcutta than in the previous year.

6. *Food-grains.*—The trade in wheat and miscellaneous spring and rain crops was well sustained, but in the case of gram and pulses and rice the figures showed a considerable decrease, owing to a poor outturn caused by unseasonable rain in the producing districts. As regards gram and pulses, the chief source of supply was Nadia, which exported 4,04,431 maunds against 4,68,702 maunds in 1890-91; the next most important supplying district was Murshidabad, which showed a decrease of 36,500 maunds; after these come Shahabad and Bhagalpur with a falling off of 24,109 maunds and 17,567 maunds, respectively. The fluctuations in the rice trade were for the most part due to shorter despatches from Dinajpur (38,010 maunds), Murshidabad (16,974 maunds), Bogra (15,358 maunds), and Malda (11,242 maunds). The following abstracts furnish separately for each article details of the food-grain traffic during the past year, as compared with the figures of the previous year:—

7. *Ghee.*—There has been a great improvement under this head over the trade of the preceding year. The principal districts which contributed to the increase in the year's traffic were Monghyr (8,946 maunds against 4,959 maunds), Bhagalpur (8,392 maunds against 6,334 maunds), and Darbhanga (2,126 maunds against 1,339 maunds).

8. *Saline substances other than saltpetre.*—The advance is attributable to a greater demand for *sajee* and *khari* for local consumption. Almost all the supplying districts contributed to the increase, specially Ghazipur (80,492 maunds against 69,626 maunds), Muzaffarpur (24,454 maunds against 18,910 maunds), and Murshidabad (4,145 maunds against only 4 maunds in 1890-91).

9. *Oilseeds.*—The great bulk of this traffic comes from the Bihár districts. In the case of linseed, the figures remained stationary, while those under mustard seed showed a heavy decline, namely 1,84,328 maunds and 2,57,010 maunds in comparison with the two years 1890-91 and 1889-90, respectively. The

largest decrease, amounting to 55,411 maunds, occurred in the shipments from Purnea. The other districts in which there was a considerable falling off are Monghyr (39,722 maunds), Bhagalpur (25,358 maunds), Darbhanga (21,980 maunds), and Champaran (18,656 maunds). The traffic under other oilseeds showed great activity during the year, owing to larger shipments of castor seed which yielded a good outturn, and for which there was a good demand in the Calcutta market. The following statements show the different blocks from which oilseeds were exported during the past two years:—

Linseed.

10. *Sugar.*—The traffic under this head shows a steady decline. In 1889-90 the total imports of refined sugar amounted to 28,608 maunds, and those of unrefined sugar to 36,930 maunds, but during the year under report the figures have dwindled down to 12,164 maunds and 10,513 maunds, respectively. The districts of Goruckpur and Ghazipur are the chief sources of supply, and exports from those places to Calcutta fell off considerably.

11. *Tobacco, unmanufactured.*—The total traffic under this head remained unchanged during the past two years. The great bulk of this staple is shipped

from Dulalganj in the Purnea district for Bhuddressur in the Hooghly district. The distribution of the entire supply during the past two years was as follows:—

12. *Timber.*—The decrease in the timber traffic was owing to the Bhagirathi being more shallow in 1891-92 than in 1890-91. Fewer vessels also passed down the Jalangi during the cold season.

13. The chief fluctuations in the upstream traffic, as compared with the results of the two previous years, are shown in the abstract below:—

14. *Coal and coke.*—The traffic in coal and coke showed great activity during the past year, in consequence of a large quantity having been despatched to Rajshahi to meet the requirements of the silk filatures of Messrs. Watson and Company. Coal is also now largely consumed for brick-burning purposes. Of the total imports aggregating 245,970 maunds, 96,197 maunds were consigned to Rajshahi, and 62,482 maunds to Nadia.

15. *Gunny cloth.*—The requirements of the grain traffic gave a great stimulus to business in gunny cloth during the year under report. The increase was chiefly in the despatches to Bihár, as the following figures will show:—

		1890-91.	1891-92.

	Muzaffarpur	...	31,600
	Total ...	92,283	210,496

16. *Rice and paddy.*—The increase in the rice trade was due to the consignments to Bihár, where there was a scarcity, having risen from 9,900 maunds to 66,876 maunds. To Nadia, however, there was a falling off of 14,700 maunds. The destination of the exports was as follows:—

Paddy was chiefly sent to the Nadia district, which received 2,57,284 maunds during the past year, against 2,75,449 maunds in the year before.

17. *Kerosine oil.*—The consumption of this oil in the interior is increasing every year. The largest consignments during the year under report were to Patna (70,223 maunds), Goalpara (60,645 maunds), Rajshahi (31,431 maunds), Murshidabad (27,220 maunds), and Malda (24,660 maunds).

18. *Salt.*—The decrease in the exports of salt by this route is due to the railway having attracted a larger supply during the past year than in 1890-91. Further particulars of this traffic are given in the Calcutta section of this report.

4. *Rice.*—Rice was the chief article which was carried during the past year. The large increase shown above was chiefly due to heavy despatches from the Midnapore district, as will be seen from the details given below:—

2. Hitherto in the classification of "down" and "up" traffic in the trade returns of the Hijili Canal, all goods passing from Calcutta used to be shown under the former head, and those moving towards Calcutta under the latter head. In the case, however, of the Midnapore and Orissa Canals and the Nadia Rivers, the practice was just the opposite. With the view, therefore, of adopting one principle applicable to all the canals and navigable rivers, the Public Works Department of this Government directed that, with effect from the 1st April 1891, all traffic on the Hijili Canals if moving towards Calcutta should, as in the case of the other canals and rivers, be taken as "down," and if moving from Calcutta as "up" traffic. The necessary alterations have accordingly been made in the returns, and the figures shown in the above statement under the heads "down" and "up" traffic will, therefore, not correspond with those published in the previous reports.

3. The different districts which contributed to the trade passing this route during the last three years are shown in the subjoined statement:—

4. In the down traffic, rice and paddy formed the main articles of trade, they together representing in weight 83·92 per cent. of the total trade under this head, as shown above.

Down traffic.

The chief fluctuations in the past year's traffic, as compared with the figures of 1890-91, are noted below:—

5. *Rice and paddy.*—The advance in the rice trade was due to the great activity in the Calcutta rice market, and the consequent increase in the export traffic carried down the canals. The movements of this traffic during 1891-92 are illustrated in the following statement:—

In connection with the Calcutta rice trade, Midnapore stands second among all the supplying districts of Bengal, while, as regards paddy, it stands third. 6. *Timber.*—A great portion of this traffic, amounting to 53,619 maunds, was purely local, exported chiefly from the town of Midnapore (47,632 maunds) to places like Chilka (18,790 maunds), Panchkura (6,282 maunds), Tamluk (5,436 maunds), Dainan, Geokhali, Panchpara, Balichuck, Samganj, and a number of other places in the interior of the district. The consignments from Midnapore to Hooghly amounted to 3,544 maunds, and the importation into Calcutta by this route aggregated 60,606 maunds.

7. *Jute, raw.*—The increase under this head was due to the very high prices which ruled in the Calcutta market, and which stimulated exports by this route. Last year the contribution from the Midnapore district amounted to 40,714 maunds, and that from Hooghly to 28,982 maunds.

8. *Sugar, unrefined.*—The entire supply was sent to Calcutta, with the exception of 807 maunds consigned for Midnapore, the chief source of supply being Koiti Sirampur in the Hooghly district.

9. *Hides, raw.*—The price of raw hide being generally higher in the Calcutta market than in the previous year, large exports were made from the Midnapore district to meet the Calcutta demand.

10. *Cotton piece-goods, Indian.*—The heavy decline under Indian cotton piece-goods is due to the preference given to Manchester goods which are driving hand-made goods out of the local markets.

Up-traffic.

11. In the upward traffic, the only articles in which there were marked fluctuations were unmanufactured tobacco and salt. In the case of the former article, the figures showed an advance of 20,931 maunds in comparison with 1890-91, while under the latter head, there was a decrease of 45,533 maunds. The trade in these staples was practically between Calcutta and Midnapore.

12. *Salt.*—The falling off in the consignments of salt by country boats from Calcutta to Midnapore was not compensated for by larger despatches by inland steamers, as will be seen from the details given below:—

Imports into Midnapore from Calcutta.

	By country boat.	By inland steamer.	Total.
	Mds.	Mds.	Mds.
1890-91 ...	2,95,959	85,287	3,81,246
1891-92 ...	2,35,719	86,072	3,21,791

In paragraph 28 of the Report on the Administration of the Salt Department for the year 1891-92, allusion is made to a growing tendency among the people in the Midnapore district to resort to illicit manufacture of salt and of the decrease in the recorded sales of imported salt in certain thánas of that district. How far the decrease under notice may be attributed to these causes cannot be stated.

CHAPTER V.

For the reasons explained in paragraph 2 of chapter IV of this report, the figures shown in the foregoing statement have been so compiled as to include all traffic moving towards Calcutta as "down" traffic, and that carried from Calcutta as "up" traffic. The figures published in previous reports will not, therefore, correspond with the revised totals now presented.

7. The distribution of the trade, district by district, during the past three years, was as follows :—

CHAPTER VI.

BOAT TRAFFIC ON THE CALCUTTA CANALS.

THE total quantity and value of the trade of Calcutta carried by country boats along the Calcutta canals during the past three years are shown below:—

Boats which have been loaded, or are to be unloaded at the Port Commissioners' wharves on the Hooghly, are registered by the Port Commissioners, and consequently are not registered at the canal stations.

2. The foregoing statement shows a great expansion of traffic in comparison with the transactions of the two previous years. As regards the import traffic, the articles which showed a marked increase over the trade of the previous year were rice (16,19,939) maunds), gram and pulse (1,59,345 maunds), paddy (85,904 maunds), til seed (60,375 maunds), and mustard and rape seed (54,650 maunds); and the staples in which the largest decrease occurred were raw jute (8,04,089 maunds), firewood (65,231 maunds), linseed (63,100 maunds), and lime and limestone (51,138 maunds).

The largest fluctuations in the export trade are an increase of 1,43,332 maunds under salt, and a decrease of 1,33,798 maunds under coal and coke.

3. Detailed statements of this trade are published in the appendices to this report.

CHAPTER VII.

TRAFFIC ON THE BRAHMAPUTRA AND MEGHNA RIVERS, INTERNAL AND EXTERNAL (WITH ASSAM).

THE registration of traffic on the Brahmaputra and Meghna rivers is effected under three different heads, namely :—

(1) traffic carried by the River Steamer Companies;
(2) traffic carried by the steamers of the Eastern Bengal State Railway; and
(3) trade of Bengal with Assam carried by country boats.

2. The total traffic registered last year is compared below with the figures of the two previous years :—

4. Compared with the previous year, the most important fluctuations in the imports from Assam were an increase of 7,84,307 maunds under coal and coke and of 25,794 maunds under mustard seed, while raw jute fell off by 40,113 maunds, linseed by 38,783 maunds, and Indian tea by 15,916 maunds. Looking to the articles exported to Assam, the largest advance occurred under rice (93,150 maunds), and the largest decrease under treasure (Rs. 1,82,176).

External trade of Bengal with Assam.

5. As regards the internal trade of Bengal, there was a large expansion in the traffic in raw jute, which alone showed an increase of 4,07,302 maunds in the imports into Calcutta, chiefly from Sirajganj, as compared with the preceding year, while the quantity of betelnuts sent to Calcutta from Nalchiti in Backergunge declined by 21,631 maunds. As regards the export traffic, the consignments of coal from Calcutta showed a rise of 45,991 maunds, and those of salt of 27,800 maunds, while the despatches of gram and pulse to Dacca and Pabna showed a falling off of 12,651 maunds.

5. Owing to unfavourable weather in the provinces where this staple is chiefly grown, there was again a small crop in 1891, which accounts for the large decrease shown above. The fluctuation in the imports by sea was due to a large supply of raw cotton from coast ports, chiefly Bombay, for use in the local mills around Calcutta.

Imports.

The abstract below shows province by province the sources of supply during the past three years:—

6. The North-Western Provinces and Oudh have hitherto held the first place among the exporters of raw cotton, but during the year under report it stands second on the list. The despatches from Bullandshahar fell off by 94·40 per cent., from Etawa by 73·87 per cent., from Alighar by 69·82 per cent., from Cawnpur by 45·94 per cent., and from Agra by 31·41 per cent. In the case of Rajputana, Jaypur alone showed a decrease of 92·37 per cent., and Ulwar of 82·74 per cent. In the Panjab, the decline occurred chiefly in the consignments from Gurgaon and Delhi, the figures for which fell off by 79·35 per cent. and 73·54 per cent., respectively, as compared with those of 1890-91. The increase in the imports from districts in Bengal was almost entirely due to larger supplies from the Chittagong Hill Tracts, where the crop was the finest ever known.

7. The heavy falling off in the export traffic was entirely due to a smaller sea-borne trade owing to a poor crop, as stated above, and the unfavourable condition of the home market, where very low prices ruled for this staple, in consequence of the enormous cotton crop of America. The absence of demand in Europe for Bengal cotton is ascribed to the Bombay mills having destroyed the trade which the Lancashire mills had in the spinning of coarse yarns and the weaving of coarse goods for India, and consequently the consumption of the short-stapled cotton in the United Kingdom is fast shrinking, the shipments from this country being now insignificant. The subjoined statement shows the destination of the quantity shipped from Calcutta by sea during the past three years:—

The fall in respect of the consignments to the United Kingdom has already been explained above. Among other foreign ports there were heavy decreases in shipments to Germany, Austria, France, Italy, and China. These decreases were not compensated by larger exports from the western side of India.

The foreign export trade in cotton twist and yarn of Indian manufacture is practically carried on exclusively with China. The large falling off in the exports shown in the foregoing table is due almost entirely to the shipments to Hong-Kong having declined from 6,202,200 lbs or 75,374 maunds in 1890-91 to 2,465,200 lbs. or 29,959 maunds in the year under review. The deficiency in the supplies from Calcutta was not made up by Bombay, from which port also the exports to China showed a considerable decline, amounting to nearly 72 per cent., owing to the unusually large exportation in 1890-91. Japan is now making its own twist and yarn, and possibly China drew part of its supplies from that country.

15. These figures represent declared values in all cases, with the exception, however, of piece-goods carried by railway and by inland steamers, in which cases they are registered by weight only. In the case of imports by rail, the value of these goods has been calculated according to the value rate of the different exporting provinces. Under the other heads, values have been calculated at the rate of Rs. 68 per maund, which has been taken to represent the average value of a maund of European piece-goods of all sorts in Bengal.

The Customs report shows that in Calcutta the trade in cotton piece-goods during the past was an unfortunate one for importers. A constant fall in the

value of raw cotton, with a corresponding decline in the manufactured article, and the lower rates of exchange have had a most disastrous effect on those merchants who bought their goods in anticipation of the market.

Exports.

16. The export trade of the past year showed a heavy decline. The partial failure of the crops, with consequent higher prices for food-grains, militated against a full distribution of this class of goods. The following abstract shows in detail the different provinces to which piece-goods were exported from Calcutta during the past three years:—

Comparison of imports with exports.

17. After adding 25 per cent. to the total clearances from shipboard and from bond on account of under-statement of values, insurance, landing charges, &c., &c., the value of the total imports during the past year by all routes comes to Rs. 15,67,03,583. The value of piece-goods exported amounts to Rs. 13,25,32,842. The surplus of imports over exports, therefore, amounted in value to Rs. 2,41,70,741, against Rs. 96,58,765 worth in 1890-91, and Rs. 74,40,309 in 1889-90.

20. The excess of imports over exports amounted, therefore, to Rs. 4,70,14,962, which among a population of 44,505,790 souls (excluding Bihár and Orissa) would give an average consumption of Re. 1-0-11 worth of goods per head against Re. 1-4-10 in 1890-91 and Re. 1-6-11 in 1889-90.

33. The number of cotton mills which were worked by steam in Bengal during the year were 8, of which 4 were in Howrah and 4 in the 24-Parganas district, but in none of them were piece-goods manufactured during the past year.

INDIGO.

34. In the following statement the trade of Calcutta in indigo during the past year is compared below with the trade of the two preceding years:—

There has been a great recovery in this trade. According to the Customs return, the price of indigo averaged Rs. 197 per Indian maund, against Rs. 216 in 1890-91. The quality of the crop was generally up to the average, but the falling off in the price is believed to be due to a large crop.

Imports.

35. The increase in the imports is attributable to the greater production in all the supplying districts, especially in Lower Bengal and Bihár. The chief sources from which indigo was despatched to Calcutta during the past three years were as follows:—

	1889-90.	1890-91.	1891-92.

In the case of the supplies from Bihár, the principal fluctuations as compared with 1890-91 were an increase of 8,933 maunds from Darbhanga, 7,393 maunds from Muzaffarpur, 7,350 maunds from Saran, and 4,776 maunds from Champaran. Of the Bengal districts, the despatches from Nadia aggregated 14,561 maunds, against only 5,782 maunds in the year preceding.

36. The exports of indigo by sea during the past year were the largest known for many years. The different ports to which the supplies were carried during the past three years were as follows :—

The Customs report for the past year shows that in the London market prices of indigo were generally lower than in the previous year. Alizarine and other coal-tar products have been used to the detriment of indigo, but it is said that they are really dearer in price, though simpler in use, and that they do not give the satisfaction in dyeing woollens as indigo does, and so long as the prices of indigo continue on the present scale, there is not much fear of the consumption being materially affected.

38. As stated in the last report, the jute crop in 1890-91 was unprecedentally large and prices were very low. This led to a smaller area being cultivated during 1891-92, and the weather moreover being unfavourable for jute cultivation, the crop

was the smallest seen for many years. As a consequence of the diminished outturn, prices ruled exceptionally high at the close of the year, being double those at the beginning. Last year the largest fluctuations occurred in the consignments from Faridpur, Dacca, and Mymensingh, as will be seen from the details given in the subjoined table, which also shows the proportion borne by the quantity carried by rail to the total trade in respect of all the principal jute-producing districts:—

39. The heavy decrease in the export trade of the past year is worthy of notice. The Collector of Customs, Calcutta, remarks that the short crop is a serious matter to Dundee, for it is doubtful if, even with the remains of the large crop of the previous year, there will be sufficient jute to enable all the mills to continue working. The supply exported by sea during the past three years was destined as follows:—

As was to be expected with a smaller crop, the exports to all countries, except Australia, decreased. To the United Kingdom the decline was 19 per cent., to Austria 53 per cent., to Germany 33½ per cent., and to the United States 46½ per cent. France, Italy, and Spain also received smaller quantities.

41. The great divergence in the figures between imports and exports represents part of the outturn of the mills in Calcutta and the suburbs, which does not fall within the scope of registration. Ordinarily, it would have been presumed that with a small crop of jute and high prices the manufacture of bags would have fallen off; but, as the figures testify, such has not been the case, owing, no doubt, to the stocks held of the cheap jute of the previous year. It is reported that the local mills have not had a bad year, and in many cases handsome dividends were paid. The districts which despatched gunnies in large quantities to Calcutta during the past three years are named below :—

On the western side of India, both Bombay and Sind took larger quantities owing to the increased exports of wheat and seeds from those places. As regards the foreign ports other than the United Kingdom, there were increases to Egypt, the Straits Settlements, and to the United States. To the last-named country and to Hong-Kong the advance was $42\frac{1}{2}$ per cent. The larger shipment of wheat from the United States and from Egypt during the past year is probably the reason for a larger consumption of bags.

It has been explained in previous reports that gunny-bags and gunny-cloth are shown together in the railway returns. Moreover, in the case of the trade by road and river, this article is registered in pieces, while in the sea-borne trade returns it is shown in yards. For the purpose of converting pieces into yards, a machine-made piece is taken as equal to 80 yards, and a hand-made piece as equal to 22 yards. The foregoing figures, therefore, do not represent the actual extent of the transactions in Calcutta under this head, part of the trade in gunny-cloth having been included under the head "Gunny-bags."

The large increase under "Other foreign ports" was chiefly due to the great demand for gunny-cloth in the United States, to which country the exports rose by 46½ per cent. This increase is probably due to the larger requirements in connection with the movements of the large cotton crop in that country last year.

47. In addition to the registered supplies detailed above, the consignments of power-loom gunny-cloth sent up-country direct from the neighbouring mills without passing the Port Commissioners' wharves, but intercepted at the toll-stations on the Nadia rivers, were as follows:—

48. The number of jute mills worked by steam in the vicinity of Calcutta during the past year was 24 against 23 in 1889-90 and 1890-91. The quantity of jute worked up in 1891-92 was 62,65,093, maunds, against 47,15,495 maunds in 1890-91, and 47,74,777 maunds in 1889-90. Figures, however, are not available to show separately how much of the raw material was used in making gunny-cloth and gunny-bags. The table below shows the number of looms and spindles at work, and the aggregate quantity of rawjute consumed in the mills in each district, during the past three years:—

50. Throughout the year there was an exceptionally brisk demand in Calcutta for export to London and the Continental ports, and hence the large increase shown above. In the following statement the total imports into Calcutta from the different provinces are arranged according to the volume of trade :—

51. In the North-Western Provinces and Oudh there were heavy increases in the despatches from almost all the supplying districts, notably Bulandshahar (7,02,227 maunds), Moradabad (4,72,042 maunds), Alighar (4,18,614 maunds), Shahjehanpur (3,36,464 maunds), Cawnpur (3,22,830 maunds), Hardai (3,18,744 maunds), and Bareilly (2,30,832 maunds). As regards Bihár, notwithstanding the smaller outturn last year all the producing districts showed an advance, chiefly Monghyr (1,77,842 maunds), Patna (1,23,956 maunds), and Shahabad (1,12,918 maunds). Of the Bengal districts, Nadia showed the largest increase, namely, 2,22,259 maunds.

52. The subjoined statement shows the destination of the quantities shipped from Calcutta by sea during the past three years :—

53. The advance to the United Kingdom was 144 per cent., while to Belgium the shipments were more than ten times as great as those of the previous year. After a number of years, there was a resumption of exports to Germany, and after one year to Egypt. The large increase in the shipments to the United Kingdom was due entirely to the failure of the wheat crop in certain parts of Russia, the consequence being that there was a large falling off in exports from that country, and an increase in the supplies attracted from India.

GRAM AND PULSE.

54. Under this heading are included *matar* (*Pisum arvense*), *khesari* (*Lathyrus sativus*), *masuri* (*Ervum Lens*), *maskalai* (*Phaseolus Mungo*, variety *radiatus*), *mung* (*Phaseolus Mungo*, varieties green gram and *aureus*), *bût* (*cicer arietinum*), or *chhola* and *arhar* (*cajanus indicus*). The gross weight of the Calcutta trade in these grains during the past year as compared with the figures of the two previous years was as follows :—

56. The increase in the consignments from Bengal is very marked. The exports from the districts of Nadia alone showed an advance of 1,99,458 maunds. The other districts which showed a large advance were Jessore (1,34,117 maunds) and Faridpur (1,30,888 maunds). The exports from the Central Provinces show an increase of 2,25,987 maunds. In all the other cases, the variations require no special notice.

57. The total quantity of gram and pulse exported by sea during the past three years was distributed as follows :—

Last year a large quantity of gram was shipped to Mauritius, and it is stated that, owing to regular communication by steamer, this trade which for a couple of years had been diverted has now come back to Calcutta. The coasting trade also was on a very much larger scale than in the previous year.

Notwithstanding the indifferent crops and the consequent rise in price, there was a brisk demand for export, due to the scarcity in Upper Burma and Madras, and enormous quantities of rice were sent to Calcutta from almost all sources of supply. These causes account for the considerable increase in the import traffic under this head.

The chief feature of interest in the above statement is the heavy import of rice from the Central Provinces which never existed in previous years.

The cause of the large increase in the exports of rice to coast ports has been explained above. The fluctuations in the export trade with "Other foreign ports" are an increase in the shipments to Cape Colony, the West Indies, the Straits Settlements and Ceylon, against decreases to Mauritius, Réunion, South America, Aden, Arabia, and Australia. The Customs Report shows that the rice trade in Europe was for a considerable period of 1891-92 devoid of any special features; prices remained on about the same level for some time, when some unusual increase in consumption in several districts caused an advance in value, and the higher prices evidently drew larger supplies from Bengal.

61. The stocks of rice at all the markets and warehouses in Calcutta and the Suburbs in the first week of April 1892, as compared with the figures for the two previous years, were as follows:—

Paddy is not accounted for in the foregoing statement. The total imports of paddy during the past year being 13,56,068 maunds, and the total exports 6,27,130 maunds, there remained a balance of 7,28,938 maunds, which, at the rate of 25 seers of rice to a maund of paddy, is equivalent to 4,55,586 maunds of rice.

MISCELLANEOUS SPRING AND RAIN CROPS.

62. The principal staples comprised under this head are barley, *kodo*, *shama*, Indian-corn, oats, millets, and other crops which are reaped during the spring and rainy seasons. The following statement shows the total trade of Calcutta in these grains, registered during the past three years:—

Of all the supplying districts, the largest increase is shown under Patna, which despatched 1,81,088 maunds during the year, against 1,40,521 maunds in 1890-91.

Imports.

66. There was throughout the year a good demand for all the supplies sent forward, and prices generally were higher. The fall in exchange also assisted exporters by enabling them to pay the higher rates demanded by dealers. The abstract below shows the different provinces from which the hide supply was derived during the past three years:—

	1889-90.	1890-91.	1891-92.

Total ...	4,763,095	5,387,165	4,831,534

The falling off in the imports from Bengal was chiefly owing to short shipments from Dacca (149,576 pieces) and Nadia (75,632 pieces). The Bihár districts from which the imports were specially smaller than in the previous year were Patna (415,032 pieces), Darbhanga (55,472 pieces), and Bhagalpur (50,984 pieces). On the other hand, the imports from the North-Western Provinces and Oudh showed an increase, due to larger consignments chiefly from Moradabad (57,504 pieces) and Shajehanpur (47,616 pieces). The supplies carried from Delhi showed a rise of 164,762 pieces.

67. The destination of the sea-borne exports during the past three years was as follows:—

The large decline to the Unitod Kingdom is attributable to a diversion of shipments from the United Kingdom to Germany direct, the exports to which country advanced by 73¾ per cent. Germany is said to be now the largest consumer of hides shipped from India.

SALT.

68. The import and export trade of Calcutta in salt during the past year, as compared with the totals of the two previous years, is given below:—

69. The above figures show a decrease in the imports, but a rise in the exports. Owing to the falling off in imports, the stocks in bond were largely drawn upon and at the close of the year were reduced to 13,73,061 maunds, against 22,46,432 maunds at the close of 1890-91. The fluctuations in the price of salt in the Calcutta market were considerable. The average price of 100 maunds of Liverpool salt in April 1891 was close on Rs. 80, whilst in November it fell below Rs. 53. From that point it has again risen to over Rs. 60.

70. The sea-borne supply of salt into Calcutta during the past three years was derived from the following sources:—

Imports.

Total ...	356,421	339,336	3,23,372	97,02,573	92,37,467	88,02,896

During the year under report, salt was imported from a new source, Fougies, a port in Asiatic Turkey. This salt is a very superior white *kurkach*, but the Collector of Customs, Calcutta, is of opinion that there is not much prospect of its being able to compete with Aden salt, owing to the distance it has to come, and the Suez Canal charges it has to bear. The increase in the importation of salt from Germany has been largely influenced by the direct trade which has sprung up between Calcutta and Hamburg, owing to the dock strikes in England. Goods, which were formerly shipped to England and reshipped to the continent and elsewhere are now largely shipped to Hamburg direct, and salt forms the ballast for the outward voyage.

71. In addition to the above supply, the amount of indigenous salt carried to Calcutta by the East Indian Railway was 375 maunds, against 1,264 maunds in 1890-91, and 1,319 maunds in 1889-90.

Exports.

72. The distribution of the Calcutta supply during the past three years is classified by provinces in the following statement:—

74. The quantities of salt carried to each of the Revenue Divisions comprising the Bengal Province (as distinguished from Bihár) from Calcutta direct during the past three years were as follows:—

the grand total of taxed salt available in the whole province would amount to 56,00,033 maunds, against 55,86,177 maunds in 1890-91, and 53,28,202 maunds in 1889-90.

Exports.

75. Out of the above supply, however, a small deduction will have to be made on account of the supplies sent to places outside the province of Bengal Proper, excluding Bihár, as shown below:—

	1889-90.	1890-91.	1891-92.

Consumption per head of population.

77. The population of Bengal Proper excluding Bihár according to the recent census being taken at 50,249,862 souls, the consumption of salt is shown to be 10 lbs. 11 oz. or 5 seers 3 chitaks per head, against 10 lbs. 7 oz., or 5 seers 1 chitak per head in 1890-91, and 11 lbs. 3 oz., or 5 seers 7 chitaks in 1889-90.

SALT TRADE OF BIHÁR.

78. The Bihár imports from Calcutta direct, division by division, during the past three years are shown below:—

80. The net quantity left would accordingly amount to 26,40,004 maunds during 1891-92. The population of Bihár being 24,393,504 persons, this supply would furnish 9 lbs. or 4 seers and 6 chitaks per head of the population for the year, against 9 lbs., or 4 seers and 6 chitaks per head in 1890-91, and 8 lbs. 10 oz., or 4 seers 3 chitaks, in 1889-90.

Salt trade of Calcutta with Assam.

81. The supply of salt sent to Assam from Calcutta aggregated 5,17,008 maunds during the past year, against 5,14,196 maunds and 4,72,353 maunds in 1890-91 and 1889-90, respectively. Last year the quantity exported by inland steamers was 2,95,518 maunds, against 2,21,384 maunds carried by country-boats, and 106 maunds by rail.

The foreign trade was in much the same condition as in 1890-91. The decrease may be attributed to the low prices which ruled throughout the year. Among "Other foreign ports" there was a falling off to the United States and China against increases to France, Mauritius and the Straits Settlements.

LINSEED.

86. The total weight of linseed imported into, and exported from, Calcutta during the past year is compared below with the trade of the two years 1890-91 and 1889-90:—

87. There was a good demand for this staple in the Calcutta market during the past year. At the close of the year high prices prevailed, and the large supplies were readily taken up, exchange and low rates of freight being favourable to business. The following are the different provinces from which linseed was imported during the past three years:—

88. The principal districts which contributed to the increase in the imports from Bihár in comparison with 1890-91 were Patna (2,12,542 maunds), Shahabad (1,82,569 maunds), Gaya (1,56,307 maunds), and Monghyr, (1,10,532 maunds). In the Upper Provinces, the increase was most conspicuous in the consignments from Allahabad (1,34,339 maunds), Bara Banki (1,02,402 maunds),

Fyzabad (79,722 maunds), Gonda (72,831 maunds), and Gorakhpur (65,197 maunds). The improvement under Rajputana is chiefly due to an increase of 59,768 maunds in the supplies from the Sutna district.

Exports.

89. The sea-borne exports during the past three years were distributed as follows:—

The large exports to the United Kingdom are ascribed to a fall in the imports into that country from Russia. Last year there was a remarkable decline in exports to the United States, amounting to 84¼ per cent., the figures being the lowest for many years. The reason for this is the enormous crop of flax seed in that country during the past year.

MUSTARD SEED.

90. The aggregate quantity of mustard seed carried to, and from, Calcutta during the past three years was as follows:—

Imports.

91. The continental crop of rape seed was not good during the past year, and therefore larger imports were necessary to supplement them; hence the increase in the imports shown above. The different provinces which contributed to the import trade during the past three years are mentioned below:—

Principal railway stations.

92. The chief advance occurred in the supplies from Bengal and the Upper Provinces. In the case of the former, large despatches were made from Faridpur, Jessore, Khulna, and Mymensingh, which exported 1,78,431 maunds, 32,601 maunds, 26,559 maunds, and 23,538 maunds, respectively, more than in 1890-91. As

regards the North-Western Provinces, the Bahraich district showed an advance of 42,716 maunds, Allahabad of 39,245 maunds, and Gonda of 33,886 maunds.

Exports.

93. In exports, the largest increase occurred in the quantities shipped from Calcutta by sea, the details whereof during the past three years are given in the subjoined table:—

There were large shipments to Belgium and Germany against a heavy decline to the United Kingdom and a smaller one to France. Prices at one time ruled high in the Home markets, but subsequently fell owing to large supplies having been sent home by India, and the market at the close of the year was depressed.

94. The registered trade of Calcutta in raw silk during the year 1891-92 as compared with the totals of the two previous years was as follows:—

The description of sugar imported from Mauritius, Java, and the Straits Settlements is cane, while from Europe it is beet. It is stated that more attention is now being devoted to the refining of cane sugar on the Clyde, and that planters by improved machinery have obtained very much better results from their cane; also that cane cultivation is on the increase, and that year by year enterprising cane planters find their position improving.

100. As regards the imports by internal routes, the fluctuations in the principal districts from which the bulk of the sugar supply was drained, will be seen from the following table:—

The demand generally throughout the year was for the finer descriptions of tea. A special feature of the trade was the demand for teas for various new outlets, buyers for Bombay and the Colonies occasionally paying higher rates than could be paid by the London market. There was a decline in the average value of teas sold in Calcutta, the rate per lb being annas 6 and pies 8, against annas 7 in the previous year, and annas 7 and pies 7 in 1889-90.

103. The advance in the imports is due to a larger outturn. The following statement shows the imports of Indian tea, classified according to the provinces from which it was imported:—

Regarding the trade with the United Kingdom, it is stated that at the beginning of the year prices in London were fairly good, but they soon gave way, and there was a marked fall. The teas of the new crop which arrived in June were satisfactory, and sold readily, but afterwards the quality fell off, causing prices to decline except for a few China, Assam, and Darjeeling kinds. Heavy auctions followed and caused the price of the commoner kinds to fall to the lowest point ever touched. Concerning the trade with coast ports, one of the most satisfactory features of the year's traffic was the very large expansion in the exports to Bombay, where there was a very strong demand at times for the teas suitable for that market, and high prices were paid. This tea is principally reshipped to the Persian Gulf.

106. The increase is due to a better outturn of tobacco in Northern Bengal. There was at the same time a good demand for this article, both for local consumption and export. The following statement shows in detail the different provinces from which tobacco was consigned to Calcutta during the past three years :—

The large exports to Burma are said to be due to the failure of the tobacco crop in Upper Burma. Looking to the foreign trade, Mauritius has again taken the largest quantity, and there was a resumption of exports to Belgium, the shipments to that country being 120,000lbs. during the year.

CHAPTER IX.

4. *Lime and limestone.*—The decrease under this head occurred in the importation from Narainganj, and is attributable to a smaller demand, owing to the large quantity of the previous year remaining in hand.

5. *Cotton, raw.*—The heavy increase in the cotton trade both imports and exports was the result of the unprecedentally good crop of that staple in the Chittagong Hill Tracts. The consignments to Calcutta showed a considerable rise, namely 55,006 maunds against 26,263 maunds in 1890-91, but to Narainganj they showed a large falling off during the past two years, as the following figures will show:—

1891-92	...	1,900	5,415	7,315

6. *Cotton twist and yarn.*—There has again been a decrease in the imports of twist and yarn, followed by a larger supply of piece-goods to Chittagong from Calcutta. The figures under exports show an increase, which indicate that the local demand for the interior of Chittagong was met partly from the stocks of previous years.

7. *Cotton piece-goods, European.*—Regarding the large increase in the importation of piece-goods from Calcutta, the Administration Report of the Chittagong Division for 1891-92 shows that English piece-goods are gradually driving out country-made cloths from the market, but a considerable percentage of the advance was due to clothing for the Military police and transport followers in the South Lushai Hills.

8. *Jute, raw.*—The considerable decline in the jute trade is ascribed to a short crop and to the destruction by fire of a large quantity of this article at

Naraingan. The destination of the exports by sea during the past three years was as follows:—

9. *Rice and paddy.*—Owing to the scarcity in the Madras Presidency, the trade in rice and paddy received a great stimulus during the year under report. The principal marts, which contributed largely to the past year's supply as compared with the figures of the preceding two years, were—

The exports of rice from this port to foreign countries during the past three years have been as follows:—

			1889-90.	1890-91.	1891-92.
Rice	...	Cwts.	213,995	223,638	275,487
		Mds.	2,91,271	3,04,396	3,74,968

The increase was due chiefly to larger shipments to the Mauritius and the West Indies. There were also smaller increases in the consignments to the Maldives, Réunion and Zanzibar.

According to the coasting trade returns, the quantities of rice and paddy shipped for the different coast ports during the past three years were as follows:—

		1889-90.	1890-91.	1891-92.
Rice ...	Cwts.	123,567	231,978	274,158

	Mds.	2,08,348	2,10,155	3,08,252

Last year there were larger shipments to Madras, Cochin, Bombay, and Rangoon.

10. *Hides and skins.*—The increase in this trade is said to be due probably to the local cattle epidemic (cattle-pox) during the past year.

11. *Salt.*—The decrease in the imports of salt during the past year is stated to be due partly to the fact that there was a surplus stock of salt at the commencement of the year out of the previous year's very large importations, and partly to the state of exchange.

The quantity of salt exported from Chittagong by country boats during the past three years was despatched to the following districts:—

	1889-90.	1890-91.	1891-92.
	Mds.	Mds.	Mds.
To Chittagong ...	79,685	2,10,541	2,12,432

,, Other districts ...	2,500	3,912	1,756
Total ...	2,61,131	2,37,817	2,47,646

Besides these supplies the quantity of salt shipped for Narainganj by sea-going vessels was 1,93,496 maunds, against 2,12,197 maunds in 1890-91, and 1,41,210 maunds in 1889-90.

12. *Spices.*—The increase in the country boat traffic under this head is due chiefly to larger transactions in chillies, both as regards imports and exports. The increase in the exports by coasting vessels is also attributable to the above cause.

13. *Sugar.*—The increase in the import sugar traffic was due to greater local demand, chiefly for the purpose of making confectionery. The details of imports as regards refined and unrefined sugar are given below:—

	1890-91.	1891-92.
	Mds.	Mds.
Sugar refined	17,137	25,750
,, unrefined	25,964	37,802

14. *Tea, Indian.*—There was a small increase in the quantity of tea exported. The quality of the tea manufactured was, however, not considered up to the standard of previous years. The climate of the district, it is said, is becoming too dry for tea, but the change so far cannot be called anything but casual.
